NOTICE OF CONSTRUCTION

Teichert Construction in partnership with the City of Manteca, Caltrans, and Drake Haglan & Associates will begin construction on the State Route 120 / Union Road Interchange project. While the construction over the next 6 months will have very little impact to traffic please be aware that we will begin a major dirt import operation starting on 07/22/19. This will last for approximately 6 months, please be aware that trucks will be coming into and off the site throughout the duration of these fill operations.

The only impact to traffic now will be restriping of the Union Road overpass and installation of a safety barrier on the west side of the bridge. This work will occur on the night of 07/14/19 and may push into the following night as well. This striping and K-Rail will stay in place until the conclusion of Stage 1 construction.

Further notices will be sent out when there are major impacts to traffic or when the City feels the need to communicate any other items.

Regards,

Teichert Construction
